- Github, Gitlab, JIRA, ClickUp, Clockify, Figma, Swagger, Postman, Husky, Docker, CI/CD.

Work Experiences

Web Developer, AirRetailer, Dubai
May 2024 - Present

- Built new CBT (Corporate Booking Tool) features such as margin configuration and itinerary view across both front-end and BFF layers, improving booking flexibility.
- Refactored and optimized existing features to align with evolving business requirements, reducing technical debt.
- Led development of travel package modules, delivering complete front-end and back-end solutions.
- Collaborated with 8 front-end developers in an Agile team, ensuring the timely delivery of high-quality features.
- Implemented Prettier, ESLint, and Husky, improving code consistency and reducing review issues by streamlining team standards.

Front End Developer, Levant, Syria
Jan 2022 - Jan 2024

- Delivered new features and enhancements on the "Address Project" alongside a team of 10, using React.js and its ecosystem.
- Built secure authentication flows with role-based permissions tailored per user.
- Integrated Framer Motion for smooth animations, boosting user engagement.
- Developed RESTful APIs with Express.js, improving data exchange efficiency.
- Designed and optimized database schemas with TypeORM, enhancing performance and scalability.
- Used GitLab and project management tools (Notion, ClickUp) for remote collaboration and efficient delivery.

Front End Developer, UluTech, Syria
Jun 2020 - Jan 2022

- Contributed to "Humy" and other projects as part of an 11-member Agile team, building solutions with React.js.

- Applied caching techniques to improve app performance and reduce load times.

- Managed state efficiently with Redux for scalable front-end architecture.

- Integrated third-party APIs to extend functionality and improve usability.

- Designed responsive UI components to ensure a seamless cross-device experience.

Freelancer

- **Beirut Roaster (2024):** Developed an e-commerce website and admin dashboard with React.js, enabling product browsing, cart management, and payments via Stripe or cash. Delivered a sleek, responsive UI that boosted usability.

- **STG dashboard (2023):** Built a web dashboard to manage the STG Android app, supporting gaming and prize features.

- **Al Labeeb (2021):** Created an accessibility-focused app for Deaf users, integrating image uploads, voice recording, and camera features in React.js to enhance inclusivity and ease of use.

Education

- B.S. Software Engineering, Aleppo University, Syria | 2018-2022

Languages

- **Arabic**: Native
- **English**: Fluent
